Address: Aktobe, Kazakhstan

PROFESSIONAL EXPERIENCE

Self-taught Junior DevOps Engineer with hands-on experience building and troubleshooting an end-to-end DevOps environment on AWS. Experienced with Linux, Docker, Kubernetes, Jenkins, Terraform, Ansible, Git, PostgreSQL, Prometheus and Grafana.

HANDS-ON DEVOPS EXPERIENCE

Self-Directed DevOps Projects (2024–2026)

- Designed and implemented production-style DevOps environments independently.
- Built AWS infrastructure using Infrastructure as Code.
- Created automated CI/CD workflows with Jenkins.
- Deployed containerized applications to Kubernetes.
- Configured monitoring with Prometheus and Grafana.
- Troubleshot Kubernetes, networking, database, Docker, Jenkins and Terraform failures.
- Documented infrastructure and incident-resolution processes using GitHub.

Technical skills: AWS, Linux, Docker, Kubernetes, Terraform, Ansible, Jenkins, Git/GitHub, PostgreSQL, Prometheus, Grafana, Bash, Python

PROJECTS

End-to-End DevOps CI/CD Platform

Built a complete CI/CD pipeline for a Flask/PostgreSQL application using GitHub, Jenkins, Docker, Kubernetes, Terraform and Ansible on AWS, with Prometheus and Grafana for monitoring.

DevOps Troubleshooting & Incident Lab

Created and documented 11 real-world infrastructure failures, including Kubernetes, Docker, PostgreSQL, Jenkins and Terraform issues. Diagnosed root causes, applied fixes, and verified successful recovery.

EDUCATION

- Bachelor of Laws (LLB) in Jurisprudence (Incomplete)
 - Orenburg State University (OSU) | 2019 – 2022
 - Status: Completed 3 years of higher education.
- Diploma in Translation and Interpretation (Translation Studies)
 - Saktagan Baishev Aktobe College | 2015 – 2019
 - Major: Translation and Interpretation (Translation Affairs).
